

Crystal Star™
whole herbs for the whole person™

Dr. Enzyme™

PROTEASE
as a blood purifier*

BROMELAIN
for recovery*

GREEN TEA
as an antioxidant*

SHIITAKE MUSHROOM
for immune support*

Do you need enzyme therapy?

Protease enzyme offers powerful relief for symptoms of arthritis, carpal tunnel, and other concerns. But protease goes further, to the source of the problem for long-term joint health. Protease aids in collagen production and cartilage rebuilding to help re-establish joint integrity. Further, because protease enzymes help support healthy circulation, Dr. Enzyme™ is a good choice for heart protection, too.

Who is Crystal Star Dr. Enzyme™ for?:

- People who want a natural pain reliever
- People who need an immune system boost
- People who want a natural heart/circulation protector
- People with lung and bronchial congestion, or sinus concerns

How can Dr. Enzyme™ Enhance Your Health Program?

- Protease helps reduce discomfort from arthritis, carpal tunnel and other painful concerns.
- Cat's claw, green tea and shiitake mushroom strengthen immune defenses.
- Protease helps normalize circulation and offers heart protecting activity.

Most enzyme products on the market today are simple digestive aids. Dr. Enzyme™ is a therapeutic enzyme formula designed to be taken on an empty stomach for maximum benefits. Protease acts metabolically, cleansing the bloodstream to support your ongoing health. Dr. Enzyme™ helps you stay healthy, naturally!

The Role of Inflammation in Chronic Health Imbalance

Inflammation is a normal bodily response to illness or injury. Inflammation is a natural part of the healing process, alerting immune system macrophages to attack pathogens and repair damaged cells. But, chronic inflammation does more harm than good. It's a common denominator in syndromes like arthritis, fibromyalgia, lupus, allergies, tendonitis, and bursitis. New research shows chronic inflammation plays a major role in cardiovascular disease, too.

Inflammation of the arteries can accelerate the progression of heart disease. High levels of C reactive protein (CRP), an inflammatory agent, are actually a stronger risk factor for heart disease than high cholesterol. Further, experts now theorize that at least 30% of cancers result from chronic inflammation or infection, which, in turn, causes inflammation. Inflammation is also involved in diabetes, obesity and metabolic syndrome X. The latest research shows that the body responds to an excess of fat cells as if they were a bacterial infection! The aging process itself increases inflammation because the immune system must work even harder to clean out increased dead cells.

The Power of Protease: a remarkable enzyme!

Plant enzyme proteases are powerful therapeutic agents used in natural medicine. While protease enzymes are not a "cure all" for disease, their ability to normalize inflammation makes them a valuable asset in any natural health program. Protease, taken on an empty stomach, goes directly to the bloodstream and can reach most body tissues for rapid action. Protease also assists the body in removing undesirable proteins in the blood- a major cause of health imbalance.
